

EXTENSIONS OF REMARKS

INTRODUCTION OF THE STRENGTHEN SOCIAL SECURITY AND MEDICARE ACT OF 1999

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 28, 1999

Mr. GEPHARDT. Mr. Speaker, today I am proud to join Representatives RANGEL, MATSUI, POMEROY, BONIOR, FROST, DELAULO and a number of other Democrats in introducing the "Strengthen Social Security and Medicare Act of 1999." This bill represents President Clinton's proposal to protect Social Security by locking up the Social Security surplus so that it will not be available to be spent on other things and to strengthen Social Security by extending the solvency of the Trust Fund to 2050. Of equal importance, we will reserve by law one-third of the projected on-budget surpluses over the next ten years to strengthen Medicare.

This is a simple proposal that takes the first step in the direction of preserving and strengthening Social Security and Medicare so that they will have the financial resources to provide the benefits that America's senior citizens have come to rely on. Democrats created Social Security and Medicare to provide not just a retirement program, but a true safety net for senior citizens, their survivors and the disabled. Social Security is the most successful Federal government program, lifting nearly 15 million seniors out of poverty. It is the cornerstone of the entire retirement system and is the principal source of retirement income for two-thirds of the elderly. The baby-boomers and their children have been promised the support that they see their parents getting today. We have a responsibility to keep those promises.

This bill saves 100 percent of the Social Security surpluses, and ensures that the Social Security surplus will be saved to reduce the debt that was created by the profligate fiscal policies of the 1980's. Beginning in 2011 the interest payments that will not have to be made on that debt will be reinvested in the Social Security Trust Fund through 2044. The Social Security Actuary has analyzed the proposal and found that it will extend the solvency of the Trust Fund until 2050, an additional 16 years beyond current projections.

Medicare also faces a financial squeeze as the baby-boomers retire. This bill creates a special reserve fund equal to one-third of the on-budget—non-Social Security—surplus over the next ten years that can only be used for extending the solvency of Medicare or providing a prescription drug benefit to Medicare beneficiaries.

This is not the final word on either Social Security or Medicare, but it does lay the foundation on which long-term solutions to ensure long-term solvency can be built. In this respect it stands in sharp contrast to the Republican proposals which neither add a single day to the solvency of Social Security nor make any

provision for using the surplus to strengthen Medicare.

Finally, the Republican proposals have an escape hatch that would allow Social Security money to be used for anything that the Republicans want to call "reform"; even a plan that could lead to cuts in benefits or the ultimate conversion of Social Security into a privatized plan that gives little protection to average workers and their families. We reject that false promise in favor of keeping the commitments to Americans of all ages that have been the touchstone of Democratic policies for more than 60 years.

IN MEMORY OF MELISSA EMERY LANIER

HON. ROB PORTMAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 28, 1999

Mr. PORTMAN. Mr. Speaker, I rise today to pay tribute to the memory of Melissa Emery Lanier, a dear friend, community leader and constituent who passed away yesterday.

Melissa brought extraordinary warmth and grace to everyone and everything she touched. Known for the groups, individuals and causes she helped, she was active in numerous organizations as diverse as the College of Mount St. Joseph, the Caracole AIDS Hospice, the Fine Arts Fund, the Taft Museum, the American Negro Spiritual Festival, Hebrew Union College Academy for Interfaith Studies, the Babies Milk Fund Association, Xavier University, Stepping Stones Center for the Handicapped, the Council on Aging, and the May Festival.

She has been described as inclusive, perceptive, generous, effective, caring and gracious. And she was well known for seeking recognition for everyone but herself.

Melissa Lanier was a Cincinnati native. Her family has deep roots in our city and a strong tradition of community service. This is the legacy she continued.

She attended Bryn Mawr College, and earned her bachelor's and master's degrees from Xavier University in Cincinnati.

She was devoted to her loving family, and is survived by her husband, Addison, a daughter, Melissa Murphy, three sons, Addison II, John, and Mark, and eleven grandchildren. They have suffered a great loss. Indeed, all of us in the Greater Cincinnati area have suffered a loss with Melissa Lanier's passing, just as all of us benefited so from her rich and full life.

TRIBUTE TO PAM WOOLSEY, A WOMAN WITH A POET'S HEART

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 28, 1999

Mr. McINNIS. Mr. Speaker, every so often I hear a story of a constituent that touches me and makes me proud to be a Representative of the people. Recently, I heard one such story: the story of Pam Woolsey.

Pam works at Kathryn Senor Elementary School in Glenwood Springs, CO in the cafeteria. She is known for her good food, especially her chicken noodle soup. But it is the lessons that she instills in the kids that is really impressive.

As a poet, Pam is very accomplished. She has authored dozens of poems and short stories. Recently, she entered an international poetry contest and ended up traveling to Washington, DC where she was a nominee for the 1999 Poet of Year. Only a month ago she was honored at the Capitol by the International Society of Poets. For her work she received several plaques, ribbons, and medals as one of 100 semi-finalists in a field of 1,000 entries from around the world. The accolades did not stop there. One of her poems was professionally recorded and published in a book of international poetry.

The more I inquired into this woman's amazing story, the more I hear of her taking the time to inspire children to accomplish more and live their dreams. That hard work and dedication will take you where ever you want to go. She is touching the lives of so many children and making a difference in her community.

It is with this, Mr. Speaker, that I say thank you to this woman on behalf of the people of western Colorado for her dedication to the future of our children. She realized that one person can make a difference and she has. I wish her all the best in attaining the dream of publishing her collection of poems and continued success and happiness in life.

DR. SYDNEY E. SALMON ACCESS TO CANCER CLINICAL TRIALS ACT

HON. MATT SALMON

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 28, 1999

Mr. SALMON. Mr. Speaker, I rise to pay tribute to Dr. Sydney Salmon, who passed away recently after a three year bout with pancreatic cancer. Dr. Salmon served as the Director of the Arizona Cancer Center at the University of Arizona from its founding in 1976 until last year. During that time, he built the Center into one of the pre-eminent research facilities in the world and emerged as a national figure in cancer clinical research. A noted innovator and academic, Dr. Salmon invented numerous medical techniques that

• This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

have had a major impact on biology, and he authored nearly 400 scholarly papers.

Although ailing with cancer, Dr. Salmon set aside time to educate me about a fatal flaw—literally—in our health care system that contributes to cancer's carnage. He informed me that our system discourages patients eligible for cancer clinical trials, the most effective type of care for many with cancer, from enrolling. I learned that if it were not for clinical trials, we wouldn't have the successful treatments that we enjoy today.

Dr. Salmon inspired me to develop the Access to Cancer Clinical Trials Act, which today I rename the "Dr. Sydney E. Salmon Access to Cancer Clinical Trials Act" in his memory. I am both proud and duty bound to honor a great man with this legislation. The act guarantees cancer patients access to any federally approved cancer clinical trial by requiring insurers to pay the routine patient costs—blood work, physician visits, etc.—that would be covered if the patient was in the standard treatment of care. The measure would not require health insurers to pay for the cost of new drugs, securing informed consent, collecting and managing data or complying with research-related paperwork. All of these costs would be paid by the sponsor of the clinical trial.

For many cancer patients, cancer clinical trials are not only the best option, they are the only option. If we increase participation in cancer clinical trials we increase the survival rate and provide hope for those afflicted with this horrible disease.

Unlike the managed care bill that recently passed the House, the Sydney Salmon Clinical Trials Act isn't limited to trials sponsored by government agencies, but also covers FDA trials. Coverage of FDA trials is a critical component of anti-cancer legislation. Two-thirds of trials are FDA-approved trials. Moreover, it is not enough to only cover trials conducted by government agencies when we know that many of the most important advances occur in private trials. The proper policy is to encourage participation in all trials that meet stringent guidelines, not just those sponsored by government agencies. I will urge the House-Senate Conference that ultimately develops the final managed care reform package to include language guaranteeing all cancer patients access to safe and federally approved clinical trials.

Participation in cancer clinical trials is dangerously low. Twenty percent of cancer patients are qualified candidates for clinical trials, yet only 3 percent participate in them. One of the major reasons for this disparity is the uncertainty regarding whether routine patient care costs will be covered by managed care companies.

The decline in enrollment in trials at the Arizona Cancer Center corresponds with the rise of managed care. In 1995, the Center enrolled 398 cancer patients in 169 different clinical trials. In 1998, the numbers dropped to 246 patients enrolled in 158 studies.

Managed care companies might be excused for their policy on cancer clinical trials if studies suggested that the cost of covering routine expenses were prohibitive and would increase the ranks of the uninsured. This is not the case. A Mayo Clinic study revealed that the costs of clinical trials averaged a trivial five percent more than standard therapy.

But not trivial are the costs of not permitting patients to enroll in clinical trials. Research is

thwarted, the war on cancer is hindered and patients who have no other hope for treatment needlessly suffer. The advances in treatment that clinical trials develop—virtually all standard therapies evolved from clinical trials—ultimately reduce the cost of providing care by reducing treatment costs. As evidence of the effectiveness of clinical trials, consider that for most childhood cancers the survival rate is nearly 75 percent, in large part because 80 percent of children participate in clinical trials. Insurance companies seem to be suffering from an acute case of myopia when it comes to covering these state-of-the-art treatments.

As a conservative Republican, I've always been opposed to mandates. But the federal government has an obligation to support research and development. Unless Congress acts, and acts decisively, vital research opportunities will be lost. Some 40 major cancer groups support the approach taken in the Dr. Sydney E. Salmon Access to Cancer Clinical Trials Act. Congress should listen to the cancer community and ratify this approach.

LEASING RIGHTS FOR THE NAVAJO NATION

HON. TOM UDALL

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 28, 1999

Mr. UDALL of New Mexico. Mr. Speaker, today I introduce legislation, which is being co-sponsored by my colleagues J.D. HAYWORTH of Arizona and CHRIS CANNON of Utah, that provides for the leasing of oil and gas rights on certain lands held in trust for the Navajo Nation or allotted to a member of the Navajo Nation. This legislation would correct a serious problem facing the Navajo people in Arizona, Utah and New Mexico—the issue of "fractionated lands."

From the late 1800's through the early 1900's, the Federal Government attempted to force Indian people to assimilate by allocating parcels of traditional tribal lands to individual tribal members. This practice resulted in alternating parcels of lands being owned by individual tribal members, the state, the federal government, or other private landowners. Navajo owners were granted an undivided interest of their entire allotment as were their heirs. An undivided interest meant that the heirs received an interest in the entire original allotment rather than a portion of the original land. For example, if four heirs were to receive equal interest to a 160 acre parcel, each heir would receive a 25 percent interest in the entire original allotment—not 40 acres. Over time the number of owners with an interest in an allotment is compounded or fractionated.

This unique system has not served the Navajo people well. After nearly a century, this allotment policy has become a nightmare for the Navajo people. Keeping records straight has become an impossible task. In many cases, owners can no longer be located while some individuals are completely unaware that they are heirs to an interest in a parcel. Many times, title to a parcel is clouded when just one owner dies without a legal will.

Over the years, Congress has tried to deal with fractionated lands and other issues governing Indian land ownership without success. These issues are complex and will not fully re-

solved overnight. In the mean time, I believe it is appropriate to consider a stop-gap measure aimed at stimulating near-term economic development on fractionated Navajo lands. The bill I am introducing today will facilitate the leasing of Navajo allotted land for oil and gas development by authorizing the Secretary of the Interior to approve oil and gas leases on Navajo allotted lands when less than 100 percent of the owners agree to such lease—a mechanism that is already available to non-Indians in most states.

Mr. Speaker, this is a companion bill to a bill that has already been introduced in the other chamber on July 1, 1999, by Senator BINGAMAN of New Mexico and co-sponsored by Senators HATCH and BENNETT of Utah, and Senator MCCAIN of Arizona.

IN HONOR OF THE WOODBRIDGE-PERTH AMBOY ROTARY CLUB ON ITS 75TH ANNIVERSARY

HON. ROBERT MENENDEZ

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 28, 1999

Mr. MENENDEZ. Mr. Speaker, I rise today to recognize the Woodbridge-Perth Amboy Rotary Club for seventy-five years of dedication and service to the community.

With more than 2,500 local clubs in 174 countries, Rotary International's membership surpasses 1.2 million members, and the organization is world renowned for its efforts in serving the needs of its communities. Made up of men and women with diverse professional backgrounds, the Rotary Club was created so that its members could come together to donate their time and talent to benefit the communities in which they live and work.

The Woodbridge-Perth Amboy Rotary Club joined in this honorable cause in 1923 with the efforts of 17 members. Over the years, this club has distinguished itself through a strong tradition of member participation and active involvement in worthy community activities, focusing on humanitarian efforts and youth issues.

From remodeling homes that provide low-income housing and pledging funds that benefit senior residents, to working with the World Health Organization to eradicate illnesses such as polio in impoverished nations and providing relief for earthquake victims in Europe, members of the Woodbridge-Perth Amboy Rotary Club have remained committed not only to the people of the 13th Congressional District of New Jersey, but have extended their compassion throughout the world.

The Rotarians also have an unwavering commitment to improving their communities by concentrating on youth programs. Since the Club's inception, it has supported programs such as Scouting, elementary school mentoring, high school career day, and children's concerts. Each year, the Woodbridge-Perth Amboy chapter sponsors and hosts an educational and cultural student exchange and encourages students to pursue education by funding student loans.

The Woodbridge-Perth Amboy chapter has been a leader and a model for other Rotary clubs in addressing local and worldwide social concerns. For its members' tireless efforts in living up to the Rotary motto "Service above
